## 1.0 RFP PURPOSE

AKT Program (also AKT – LS) is implemented in 16 municipalities<sup>1</sup> with considerable presence of Serbian community. In essence, all three interventions are designed to contribute to expedited inclusion of Serbian community in the institutional and political life in Kosovo and increasing the exchanges between majority and minority communities across all spheres of life. Improvement of small-scale infrastructure and service delivery systems, coupled by increased ability to deliver quality services on the part of local governments and the efficient advocating of community needs and priorities, are encompassed in the project as different dimensions of intervention. These dimensions are expected to lead to improvement of both horizontal linkages across municipalities and vertical linkages with line ministries, through which lives of communities will be improved.

Employment and economic development are also envisaged by the project as key intervention measures aimed at contributing to the overall inclusion of the economies in the 16 beneficiary municipalities. Provision of opportunities for savvy entrepreneurially predisposed individuals and labor force development measures are the two main tools to be used for promoting employment and self-employment in the targeted communities.
